Education

Holy Angel University

Bachelor of Science in Computer Science

Expected May 2026

Skills

- Multitasker
- Composed
- Proactive
- People-Oriented
- Versatile
- Reliable

Tools

- HTML
- CSS
- JavaScript
- React
- Python
- C# (Game Development)
- Unity

Profile

A 4th-year computer science student at Holy Angel University with a foundation in software development. Knowledgeable in Python, JavaScript, CSS, React, and C#, and experienced in building interactive application games in Unity. Currently expanding my knowledge in front-end development and modern web technologies to create intuitive, responsive, and user-focused applications and websites. Passionate about developing software that enhances user experience and delivers practical solutions.

Projects

Obstacle Dodge | 2023

A Unity and C# project where players navigate a 3D world, dodging obstacles to survive as long as possible. Focuses on reflex-based gameplay and increasing difficulty.

Flexfit | 2025

FlexFit – Exercise Form Correction System (Thesis Project) Built with Python (TensorFlow, OpenCV) and Dart & kotlin(Android Studio), applying pose estimation (MoveNet) and 1D CNNs to deliver real-time feedback on exercise form in a mobile-friendly app.

Rocket Boost | 2024 - 2025

A Unity and C# project where players control a rocket ship with rotation, thrust, and gravity-based movement. Includes platforms, moving obstacles, particle effects, and audio. Developed as part of my self-taught Udemy learning journey in Unity game development.

Galaxy Strike| 2025

A rail-based precision shooter in Unity where players dodge enemy waves with the Timeline tool and eliminate targets with input-based precision shooting. Part of my Udemy learning path, focusing on Unity animation, scripting, and gameplay design.

Currently Working

CLK Inc. Website | 2025

A web-based project for my company, CLK Inc., developed with friends using basic HTML, JavaScript, CSS and React. Focused on simple dynamic interfaces, basic interactivity, and fundamental React components, reflecting our early front-end development experience.
